### Teaching and Learning Environment

- I took part in a part-time virtual exchange due to COVID-19. There was originally a fair selection of courses to choose from and since being in the UK, were all taught in English. The two courses I took part in were a combination of pre-recorded lectures, assigned readings, and live seminars (remote). Seminars involved a 1-hour class with the professor and small group of students where we went over questions based off of the readings. Both classes used a 100%, 3000-word paper as the final assessment which was due the 2nd week of January.

### Quality of Administrative Support for Students

- Registration did not occur until mid-summer. Make sure to include photo of passport with application (when applying through the Warwick portal) or else there will be delays. The administration was very helpful in helping switch my exchange from full time in person to part-time virtual when the need arose. They also supplied a tutor that could help me if I needed it.
